

# JSON-LD 1.1 Syntax

Three editorial errata:

- #364 Possible typos in Json-Ld 1.1
- #368 HTTP document
- #387 Elaborate on handling of JSON builtin types ``integer`` and ``double`` (open?)

Three ErratumRaised:

- #355 Kill "IRI"?
- #396 minor typo for `@none` language
- #397 clarify that `@none` `@id` are blank nodes, swap Examples 104 and 105

# JSON-LD 1.1 Syntax

Ten deferred issues:

- #108 Consider context by reference with metadata
- #191 Compact IRI expansion support for non-trivial prefix term definitions
- #280 language-maps don't allow separate base direction
- #328 @default in @context in JSON-LD core syntax
- #329 Suggestion about @prefix
- #335 Type Coercion / Node Conversion: @coerce keyword or similar
- #355 Kill "IRI"? (also ErratumRaised)
- #362 New feature: @template
- #372 Support multiple IRIs for @reverse
- #376 Make it easier to keep semantics of object-oriented models
